Customize → Units setup (doc setup) 25-9-18

Create → Helpers (tape icon) → tape 125ft. high off center

3. R-click snap to setup (3+magnet icon) & activate
4. Build Spline (line) half-length of tape ON center line
5. top half of spline = arch at 45° w bezier
6. make nGon → convert to editable spline & make flower shape ☆ or with ☆
7. make loft (create → compound objects) of line part (column) then of arch
8. edit path steps on curve
9. THEN convert both to editable poly
10. select collumn → 2nd red symbol selection thing → ring → connect → deselect edges (get help on this one)
11. select arch, isolate (R-click to do this), delete ends. Border select, switch to edges, deselect bottom half then delete
12. Time to mirror w/ symmetry
